General Counsel

Dated: October 12, 2004

NICE is Recognized as the Clear Leader in the Quality Management Market Worldwide in Report by Leading Independent Analyst Firm Frost & Sullivan

Ra'anana, Israel, September 8, 2004 — NICE Systems (NASDAQ: NICE), the global provider of advanced solutions and consulting services that enable organizations to extract insight from interactions to drive performance, today announced that it has been singled out as the global quality monitoring industry leader with 34.7% of the market worldwide (products and services). NICE also leads the combined software and hardware market worldwide with 41.1% market share— twice as much as its closest competitor.

Frost & Sullivan's World Agent Performance Optimization Market report shows that NICE also leads each major geographical region, with 34% in North America and 51% in EMEA. This follows the 54.4% total market share in APAC market share published earlier this year.

According to the report, this success was a result of both organic growth and the 2002 acquisition of TCS, as well as "a technologically strong and robust product line, a vision for the future, an established global distribution network and the strength of the Customer Experience Management concept."

In addition, the report confirms the convergence of total recording and selective recording markets, and cites the benefits of choosing a single vendor with a combined offering. "We believe that the markets for full and selective recording have converged. From a quality monitoring perspective full or selective recording is not the question. The key is the benefits that can be accrued in terms of enhancing agent quality and optimizing call center performance. From the enterprise perspective, dealing with a single supplier for both full and selective recording is a benefit," says Seema Lall, industry analyst, Frost & Sullivan.

"We are happy to see further recognition of our market leadership and reinforcement of our long-time strategy of providing fully integrated compliance/risk management and quality monitoring solutions," said Zvi Baum, corporate vice president and general manager, product division, NICE Systems. "Frost & Sullivan's report validates our view that the arbitrary difference between selective and total recording is disappearing as more enterprises worldwide realize the clear benefits and greater value in the integrated approach."

About NICE

NICE Systems is the global provider of advanced solutions and consulting services that enable organizations to extract the value hidden within multimedia interactions. NICE solutions sharpen the awareness of organizations to help them generate insight from interactions for improved decision-making, better performance and enhanced security. NICE has more than 15,000 customers in over 100 countries, including the world's top ten banks and over 65% of the Fortune 100. More information is available at www.nice.com.

NICE Advanced Video Security Selected As a Standard Solution by One of the World's Most Prestigious Financial Institutions

A first contract valued at over \$1M has already been awarded to NICE

Ra'anana, Israel, September 14, 2004 — **NICE Systems (NASDAQ: NICE)**, the global provider of advanced solutions that enable organizations to extract insight from interactions to drive performance, today announced that it has been awarded a contract worth more than \$1M for its digital video security solution by one of the largest financial institutions in the world. NICE was selected in part for its previous successful installations at these facilities as well as for its superior digital technology in surveillance systems and its proven capabilities in distributed sites. The new contract will be implemented by ISR Solutions of Chantilly, Virginia, by the end of 2004.

The NICE solution provides high video quality with advanced video analysis capabilities for enhanced monitoring of critical premises. The system also includes a centralized management software that can deal with the large amount of live and recorded data from thousands of cameras located in one site or across different locations. All of these features are delivered at affordable total cost of ownership, maximizing the value derived from the information available and providing insight to decision-makers in these critical environments.

“Designing, installing and implementing an effective digital surveillance system of the magnitude needed by this financial enterprise is the kind of thing we do best,” said Joe Costa, President, ISR Solutions. “Combining the exceptional quality of NICE digital products with our own knowledge and experience provides the customer with a particularly effective and reliable wide scale solution, essential to all financial organizations.”

“We are delighted that our video solution has been selected by this prestigious customer,” said Doron Eidelman, corporate VP and president of NICE's digital video security division. “This is another confirmation of the trend we are currently experiencing whereby financial institutions worldwide choose NICE based on our strong technological edge to answer the specific needs of distributed sites.”

NICE's Smart Video Solutions Boost Security of Statue of Liberty

Ra'anana, Israel, September 28, 2004 – NICE Systems (NASDAQ: NICE), the global provider of advanced solutions that enable organizations to extract insight from interactions to drive performance, today announced that its smart video solutions were chosen to secure the newly reopened Statue of Liberty.

The NICE solution delivers video recording and advanced analytics applications to the United States Park Police in charge of the security of the Statue of Liberty National Monument. With high video quality and resolution, IT-grade video networking and management, and an array of proven video analysis capabilities, NICE helps streamline security operations and protect the vast complex of the Statue of Liberty.

“Currently deployed at a large number of high-profile government facilities, NICE video solutions have become the preferred choice for government officials at both the operative and directive levels. The continuing preference of NICE by this market is a testimony to our quality and reputation,” says Ian Ehrenberg, vice president and general manager of NICE's digital video security division, US. “We are honored to be part of this project to protect this national monument and its visitors.”
