NICE Actimize Selected by Bank of Ireland to Provide Enterprise-Wide Financial Crime Protection

NEW YORK – April 04, 2011 - NICE Actimize, a NICE Systems (NASDAQ:NICE) company and the largest and broadest provider of a single financial crime, risk and compliance software platform for the financial services industry, today announced that its Enterprise Risk Case Manager, Card Fraud and Anti-Money Laundering (AML) solutions have been chosen by Bank of Ireland. NICE Actimize's single financial crime platform will allow the bank to obtain a more holistic view of financial crime risk across the enterprise to help in its efforts to minimize risk and enhance regulatory compliance.

In response to rising regulatory pressure and growing fraud and AML threats, Bank of Ireland sought to be proactive by adopting a modern solution that can help them adapt to the evolving financial crime and regulatory landscape.

"The implementation of NICE Actimize's solutions is an example of our institution's commitment to staying ahead of financial crime activity," said Dermot Mullen, divisional risk partner at the Bank of Ireland. "Banks that invest in technology to protect their customers simply run more efficient businesses and reduce their operational losses. NICE Actimize's technology will help us to build upon existing preventative measures and to detect potential illicit behavior early on by providing Bank of Ireland with additional ability to monitor activity occurring within and across different segments of our organization. Further, the flexibility of NICE Actimize's platform will enable us to easily adapt as new regulations are enacted."

Bank of Ireland will implement a number of NICE Actimize financial crime prevention solutions across its businesses that will address fraud and money laundering risks. Built on a single core risk platform, all solutions connect seamlessly to provide enterprise-wide risk management and compliance support.

"We are pleased to add Bank of Ireland to our growing European, and global, customer base," said Amir Orad, president and chief executive officer of NICE Actimize. "In today's highly competitive business climate, institutions such as Bank of Ireland recognize that effective financial crime management has a great impact on banks' operational effectiveness and profitability. Bank of Ireland has proven itself as a market leader by choosing an integrated approach to fraud prevention and compliance, to better protect their clients, reputation, and business performance."

NICE Actimize, a NICE Systems company, is the world's largest and broadest financial crime, risk and compliance solutions provider. The company provides real-time and cross-channel fraud prevention, anti-money laundering, enterprise investigations, risk management and trading surveillance solutions built upon a single flexible software platform. Implemented by the majority of the world's largest financial institutions, including all of the top 10 banks, the company's solutions enable clients to mitigate financial crime risk, improve compliance, and reduce operational costs.www.actimize.com.

About Bank of Ireland

Bank of Ireland is a banking group based in the Republic of Ireland and was established in 1783 by Royal Charter. In the Republic of Ireland, the Bank is a systemically important bank in the economy with a strong brand presence. It has well-established operations in the UK and a portfolio of niche skill-based businesses internationally. It is a traditional

relationship-driven retail and commercial bank with a conservative business philosophy, diversified portfolio and income streams. It has 14,647 employees. It is a public company with its shares quoted in Dublin, London and New York. Bank of Ireland is regulated by the Central Bank of Ireland. In the UK, the Bank is authorized by the Central Bank of Ireland and authorized and subject to limited regulation by the Financial Services Authority.

About NICE Systems

NICE Systems is the worldwide leader of intent-based solutions that capture and analyze interactions and transactions, realize intent, and extract and leverage insights to deliver impact in real time. Driven by cross-channel and multi-sensor analytics, NICE solutions enable organizations to improve business performance, increase operational efficiency, prevent financial crime, ensure compliance, and enhance safety and security. NICE Enhances NICE Situator Real-time Security Situation Management Solution through Interoperability with Identity Management Solution from Quantum Secure

Interoperability with physical identity management to help security operations further mitigate risk and threats and improve security response

Ra'anana, Israel, April 04, 2011 - NICE Systems Ltd. (NASDAQ: NICE), the worldwide leader of intent-based solutions that extract insight to impact business performance, reduce financial risk and ensure safety and security, and **Quantum Secure**, the leading provider of enterprise software used to manage and streamline security identities, compliance and events across disparate physical security systems, today announced that the two companies have entered a teaming agreement to make Quantum Secure's physical identity management solution interoperable with NICE Situator.

An open situation management solution, NICE Situator correlates data from diverse security, safety and operational systems, alerting security operators in real time to incidents that require attention. Quantum Secure's SAFE physical identity and access management software consolidates proprietary, disjointed HR/IT/security systems into a single identity source to manage and streamline security identities, compliance, events and operations. Integrating physical identity management capabilities to NICE's situation management solution gives security teams a better, real-time view of what's happening, where it's happening, and who's involved – with automated decision support checklists to guide their response and actions.

A unified interface means operators can seamlessly navigate between the two systems, and take immediate action as situations warrant. For example, if a person attempts to enter a facility and the SAFE system detects that person on an internal or external watch list, NICE Situator will execute a SAFE-generated alert, simultaneously presenting relevant details about that person, along with anomalies, live surveillance video, and procedures for the operator to follow. The operator could automatically revoke the person's access privileges system-wide or take other actions as dictated by NICE Situator's adaptive response plans. These capabilities could also be beneficial in emergency situations, such as a fire, where the combination of real-time information about individuals badged into specific locations, coupled with NICE Situator's live video feeds and notification capabilities, could facilitate a more efficient and effective evacuation and emergency response.

Where post incident analysis is needed, the combined solution also enables comprehensive reporting and trending analysis. The Quantum Secure SAFE system can access historical information from all systems connected to it, and to NICE Situator as well, providing three-dimensional trending analysis that transforms security information into business intelligence. The SAFE Analytics also has drill down capabilities for detailing what happened, where, who was involved, and what actions were taken. Similarly, if access control anomalies are identified in SAFE, video and other incident details can be accessed through NICE Situator for a broader investigative view.

"We are happy to make Quantum Secure's physical identity management capabilities interoperable with NICE Situator," said Israel Livnat, President, NICE Security Group. "The addition of these capabilities will further help security operations improve response, mitigate risk, and comply with stringent regulations, such as NERC CIP-004 and CIP-006 for electric utilities, which deal specifically with identity management and physical security."

"Today's organizations are demanding interoperable solutions in order to create a homogeneous physical security ecosystem across all of their sites, systems, processes, and applications," added Ajay Jain, President and CEO of Quantum Secure. "NICE and Quantum Secure share a common vision in this respect and the interoperability of SAFE and NICE Situator is another step toward delivering these capabilities so organizations can meet heightened security and compliance requirements and streamline their operations."

The NICE Security offering addresses the needs of governments and enterprises with intent-based solutions for fighting crime and terror, by anticipating, managing and mitigating safety, security and operational risks. The offering enables capturing, analysis and correlation of data from multiple sensors and systems, including audio, video, radio, geo-location and web, providing a framework for fusing data silos into a single, holistic operational view. NICE Security solutions empower organizations to act effectively in real time to prevent, manage and investigate incidents, ensuring fast resolution and debriefing, and continuous security improvements. NICE Security solutions are deployed worldwide in transportation systems, critical infrastructures, city centers and enterprise campuses.

About Quantum Secure, Inc.

Quantum Secure's SAFE suite of software products effectively addresses the challenges associated with operating multiple proprietary physical security infrastructure systems in modern-day global corporations, airports and government agencies. SAFE provides a single, fully interoperable and integrated physical security policy platform to manage and streamline security identities, compliance, events and operations across multiple disparate physical security systems. Quantum Secure's customers include the U.S. Department of Energy, the U.S. Department of Health and Human

Services, Adobe Systems, AMD, AT&T, Baxter International, British Telecom, Juniper Networks, Oracle, Symantec Corporation, San Francisco International Airport and the Toronto Pearson International Airport. More info at www.quantumsecure.com
