**NICE Actimize Named Best Anti-Money Laundering Compliance Solution Provider in
2014 Waters Magazine Rankings Awards**

*NICE Actimize AML compliance solutions provide a common framework for full-lifecycle
detection, investigation and reporting of financial crime*

NEW YORK – July 17, 2014 – NICE Actimize, a NICE Systems (NASDAQ:NICE) business and the largest and broadest provider of a single financial crime, risk and compliance software platform for the financial services industry, announced today that it has been ranked as the Best Anti-Money Laundering Compliance Solution provider in Waters Magazine’s 2014 Rankings program, selected through a voting process conducted with the publication’s readers. In its twelfth year, this year’s Waters Rankings awards competition consisted of a total of 30 award categories.

“Our readers are from the industry’s leading buy-side and sell-side financial institutions and are experts in their fields,” according to Anthony Malakian, U.S. Editor, Waters Magazine. “The votes from our publication’s readers are a real achievement for our top-ranked companies, and NICE Actimize can be honored to have this support from the industry they serve.”

NICE Actimize anti-money laundering compliance solutions provide a common framework for full-lifecycle detection, investigation and reporting of financial crime. Each of NICE Actimize’s anti-money laundering solutions is designed to support a company’s larger enterprise financial crime prevention strategy with a shared technology platform. The Actimize Anti-Money Laundering Solutions Suite consists of Suspicious Activity Monitoring, Customer Due Diligence, CTR Processing and Automation, and WatchList Filtering, as well as the capability to address new FATCA legislation.

“This prestigious award, made even more valuable by the fact that it was a direct result of voting of readers of the publication, is continued proof of the success of our solutions,” said Joe Friscia, president, NICE Actimize. “We thank the readers of Waters Magazine for demonstrating their confidence in our technology and services in anti-money laundering.”

With a strong global presence for its anti-money laundering solutions in more than 35 countries, NICE Actimize has also achieved numerous industry analyst accolades. Among them, NICE Actimize was recognized as the category leader for financial crime risk management technology in the Chartis 2014 RiskTech100® rankings, a category which encompasses anti-fraud, anti-money laundering and trade surveillance technology solutions. In CEB TowerGroup's "2013 Know Your Customer" (KYC) anti-money laundering research report, NICE Actimize was selected as **"Best-in-Class" in three of four categories.**

About Waters

Each month, Waters reports and analyzes the business reasons for and practical implementation of financial technology in the capital markets and securities industry. Since its launch in 1993, securities industry professionals worldwide have relied on the magazine for its focused, in-depth coverage surrounding the confluence of business and technology in market data, trading & risk technology and infrastructure as well as the human issues of talent management, staff retention and compensation within the financial services community. With more than 10,100 subscribers around the world, Waters' readers enjoy the insights of CIOs and CTOs from the global markets. The magazine also releases the electronic newsletter, WatersNews, each Tuesday to more than 14,000 industry professionals and it sponsors conferences in New York, London, and Singapore plus briefings and training courses in many of the world's financial centers. Forward-Looking Statements

This press release contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such forward-looking statements, including the statements by Messer Friscia, are based on the current expectations of the management of NICE-Systems Ltd. (the Company) only, and are subject to a number of risks and uncertainties that could cause the actual results or performance of the Company to differ materially from those described herein, including but not limited to the impact of the global economic environment on the Company's customer base (particularly financial services firms) and the resulting uncertainties; changes in technology and market requirements; decline in demand for the Company's products; inability to timely develop and introduce new technologies, products and applications; difficulties or delays in absorbing and integrating acquired operations, products, technologies and personnel; loss of market share; pressure on pricing resulting from competition; and inability to maintain certain marketing and distribution arrangements. For a more detailed description of the risk factors and uncertainties affecting the company, refer to the Company's reports filed from time to time with the Securities and Exchange Commission, including the Company's Annual Report on Form 20-F. The forward-looking statements contained in this press release are made as of the date of this press release, and the Company undertakes no obligation to update or revise them, except as required by law.

NICE to Showcase Text-to-9-1-1 Logging and Other Public Safety Solutions at the APCO International 80th Annual Conference & Expo

Paramus, New Jersey, July 21, 2014 – NICE Systems (NASDAQ: NICE) today announced that it will showcase its Text-to-9-1-1 logger and other NG9-1-1-ready solutions at the APCO International 80th Annual Conference & Expo (booth 427), taking place in New Orleans August 3-6.

At the event, NICE will also introduce NICE Inform version 7, the latest release of its multimedia event reconstruction solution. Inform 7 offers organizations additional support for next generation communications, enabling them to manage text-to-9-1-1, improve responses to emergency calls, and protect callers by removing private details from the incident timeline.

Attendees can learn more about the following capabilities:

Text-to-9-1-1

- The recent enablement of text-to-9-1-1 by the four major U.S. mobile carriers shows momentum for this type of emergency communication. In line with this trend, NICE's Text-to-9-1-1 logger was developed to capture these text messages. They can then be viewed in an incident timeline along with related voice recordings, video, GIS and call-taker screens. NICE's Text-to-9-1-1 logger is compatible with NENA's i3 standard which equips it to capture future Next Gen data sources as well as support i3 environments where calls are routed from one public safety answering point (PSAP) to another.

Quality Assurance

- With NICE Inform, PSAPs can evaluate single calls as well as complete incidents, to ensure the highest quality of response. This includes monitoring and assessing the processing of multimedia input, such as audio, text, GIS, video, and CAD screens.

24x7 Screen Logging

- Capturing multiple telecommunicator screens simultaneously provides enhanced insight into every facet of call handling. Screens can be synched with 9-1-1/radio calls and other multimedia for authentic incident reconstruction. This helps identify bottlenecks, training gaps, and discrepancies among systems and communication channels.

NICE will also participate in a panel discussion on "Building Your PSAP's Roadmap: from Text-to-9-1-1 to Big Data" on August 3, at 9:30 a.m. John Rennie, General Manager of Public Safety at NICE, will share insights on the value of Text-to-9-1-1, video, and Big Data, and their impact on PSAP operations. Other participants include: Diane Culverhouse (Manager of the Jefferson County Sheriff's Office Communications Center, Golden, CO); Robert K. Gojanovich, ENP (Regional Account Manager of Next Generation 9-1-1, TeleCommunication Systems, Inc.); and David Hopkins (Director of Steuben County NY E911).

On Tuesday, August 5, at 12:00 p.m., NICE will also host an awards ceremony at its booth (#427) to honor its 2014 PSAPs' Finest Award recipients.

NICE's security solutions help organizations capture, analyze and leverage big data to anticipate, manage and mitigate security and safety risks, improve operations, and make the world a safer place. The NICE security, intelligence and cyber offerings provide valuable insights that enable enterprises and governments to take the best action at the right time by correlating structured and unstructured data from multiple sensors and channels, detecting irregular patterns, and recognizing trends. NICE Security solutions are used by thousands of customers worldwide, including transportation systems, critical infrastructure, city centers, banks, enterprises and government agencies.

**NICE Inform Crosses the 3,000 Mark: Flagship Public Safety Solution
Achieves Impressive Milestone for Worldwide Deployments**

*Increased adoption of NICE Inform affirms growing public safety need to manage expanding
multimedia content, as organizations prepare for Next Gen emergency communications*

RA'ANANA, ISRAEL, July 31, 2014 – NICE Systems (NASDAQ: NICE) today announced that it has surpassed a milestone of 3,000 worldwide systems deployed for NICE Inform, the company's flagship solution for managing multimedia incident information. Now in its seventh generation, NICE Inform has been widely adopted by emergency service centers around the globe to consolidate multimedia data for comprehensive analysis and insight. Growing numbers of emergency service centers rely on NICE Inform for investigations, incident debriefing, and quality assurance.

The public safety industry is on the threshold of major transformation as it moves toward Public Safety Broadband, NG9-1-1, and NG112. Next Gen emergency communications will go beyond voice calls, including some combination of voice, text, pictures, and video. Additional data sources – like CCTV, License Plate Recognition (LPR), weather systems, and telematics – will also deliver incident information to emergency service centers. These hubs will need to have the capability to link all of this information together for investigative insight.

The City of Oakland, for example, uses NICE Inform for multiple departments including Police, Fire, Internal Affairs and the Records Division. "With NICE Inform, all of our departments can securely access their own recorded communications, collaborate more effectively, and create comprehensive timelines for incidents involving multi-agency responses, greatly streamlining the process of building a case," said Ahsan Baig, ITD, City of Oakland. "NICE Inform also gives us a platform to capture and consolidate video, text messaging and other NG9-1-1 communications in the future."

"As progress toward these initiatives accelerates, we're seeing even greater momentum for NICE Inform," said Barak Eilam, CEO, NICE. "It's evident that emergency service centers are going to become a touch point for many new sources of data. NICE Inform will be the glue that ties all of this incident information together."

"NICE Inform was the first-to-market in 2007 and continues to lead," added Eilam. "Crossing the 3,000 mark is a testament to NICE's success in developing forward-looking solutions that align with public safety trends and address the critical incident management needs of emergency service centers worldwide. We expect interest in NICE Inform to continue to build as emergency service centers prepare for NG9-1-1, NG112 and Public Safety Broadband."
