TARIFF FORMAT

A. Page Numbering – Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.

B. Page Revision Numbers – Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc., the most current page number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the page currently in effect.

C. Paragraph Numbering Sequence – There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

D. Check Sheets – When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc., remain the same, just revised revision levels on some pages). The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

Local Inbound Service is available to customers in Flat-rate or Metered plans, as set forth below.

SECTION 5 – MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.4 Public Telephone Surcharge**

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all intrastate calls that originate from any pay telephone used to access Company provided services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with service, applies for the use of the instrument used to access Company provided service and is unrelated to the service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (e.g., using the "#" symbol). The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

SECTION 5 – MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.5 Custom Calling Features**

The features in this section are made available to Residential Customers on a per use basis. All features are provided subject to availability. The Customer will be billed the per feature activation charge shown in the table below each time a feature is used by the Customer. Transmission levels for calls forwarded or calls placed or received using optional calling features may not be acceptable for all or some uses in some cases.

5.5.1 Feature Descriptions

Call Forwarding – Fixed, Busy Line No Answer – This feature, when activated, redirects attempted terminating calls to another Customer-specified line. Call originating ability is not affected by Call Forwarding – Fixed, Busy Line No Answer. The calling party is billed for the call to the called number. Calls cannot be transferred to an International Direct Distance Dialing number.

Speed Calling – This feature allows a user to dial selected numbers by means of an abbreviated code. This feature is available in either an 8 number or a 30 number capacity. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Caller ID - Allows a Customer to see a caller's telephone number previewed on a display screen before the call is answered. Caller ID requires the use of specialized CPE not provided by the Company

Caller ID with Name – Allows a Customer to see a caller's name and number previewed on a display screen before the call is answered. Caller ID with Name requires the use of specialized CPE not provided by the Company.

If forwarded to a long distance number the Subscriber will incur the long distance charges.

Call Trace – Allows a called party to initiate an automatic trace of the last call received. Call Trace is available on a usage basis only.

Call Blocking – Allows Customer to block calls from different telephone numbers. A screening list is created by Customer either by adding the last number associated with the line (incoming or outgoing) or by pre-selecting the telephone number to be blocked. Callers from such numbers hear an announcement that the calling party is not accepting calls and Customer's phone will not ring.

SECTION 5 – MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.5 Custom Calling Features****5.5.1 Feature Descriptions (Cont'd)**

Call Waiting - Call Waiting provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both calls.

Call Waiting with Caller ID with Name – Call Waiting with Caller ID with Name provides a tone signal to indicate to a Customer already engaged in a telephone call that a second caller is attempting to dial in and allows a Customer to see a caller's name and number previewed on a display screen. This feature permits the Customer to place the first call on hold, answer the second call and then alternate between both calls.

Three Way Calling – Permits the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference.

Call Return - Allows Customer to automatically dial the number of last incoming call, whether or not Customer answered phone.

Anonymous Call Rejection - Allows you to refuse calls from those who have blocked their numbers.

Selective Call Rejection – Allows you to refuse calls from selected list of numbers.

Repeat/Auto Dial – A feature that, when activated, automatically checks a busy number and when the line is free, rings the Customer back and completes the call.

Caller Identification Blocking: Allows the name and number of the calling party to be blocked from being transmitted when placing outbound calls.

Per Call Blocking: To activate per-call blocking, a Customer dials a special code prior to placing a call. Blocking will be activated for that outgoing call only. There is no charge for using per call blocking, and it is provided on an unlimited basis.

Per Line Blocking: When blocking is established on the line, it can be deactivated by dialing a code before each call. This one call unblock allows the name and/or number to be sent for that one call only. There is no charge for per line blocking.

The following rates and regulations apply to standard listings in light face type in the white pages (alphabetical section) of the telephone directory and to the Directory Assistance records of the Company.

Directory listings are limited to such information as is essential to the identification of the listed party. The listing of a service, commodity, or trade name is not permitted unless it is the name, or an integral part of the name, under which the Customer does business.

A listing is limited to one line in the directory, except where in the judgment of the Company, more than one line is required to identify the Customer properly. In such cases, the additional lines required are provided at no extra charge.

Dual name listings are permitted as a regular directory listing for residential service.

Listing services are available with all classes of main telephone exchange service.

5.8.2 Listings**A. Primary Listing**

One listing, termed the primary listing, is included with each exchange access line and each joint user.

SECTION 5 –MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.8 Directory Listing Service (Cont'd)****5.8.2 Listings (Cont'd)****B. Additional Listings**

Additional listings may be the listings of individual names of the Customer and members of the Customer's household, tenants of residential Customers who lease the Customer's premises for less than one year and do not occupy the premises at the same time as the Customer, members of a firm, officers of a corporation, employees of the Customer or other persons associated in business with the Customer, a business which the Customer owns and cross reference and alternate number listings.

Ordinarily, all additional listings are of the same address and telephone number as the primary listings, except as provided for joint user and alternate number listings.

Special Types of Additional Listings include:

Duplicate Listings – A listing of another name by which the customer is known, such as a nickname, abbreviated name, a name commonly spelled in more than one way, and a name consisting of several words which the public commonly rearranges. The listing may be complete or in a cross-reference form.

Alternate Telephone Numbers – A listing which refers calling parties to another telephone number at certain hours or on certain days or in case no answer is received on the call to the primary number.

SECTION 5 – MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.8 Directory Listing Service (Cont'd)****5.8.2 Listings (Cont'd)****C. Nonpublished Service**

The telephone numbers of nonpublished service are not listed in either the Company's alphabetical directory or Directory Assistance records available to the general public.

Incoming calls to nonpublished service will be completed by the Company only when the calling party places the call by number, and no exception will be made, nor will the Customer be called to determine whether he/she wishes to receive the call, even though it appears that the calling party desires the connection because of an emergency.

The Company is not responsible for any claims made or liability arising from failure to receive calls because of this arrangement.

The Subscriber indemnifies (i.e., promises to reimburse the Company for any amount the Company must pay as a result of) and save the Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the publication of a non-published service or the disclosing of said number to any person.

D. Nonlisted Service

Nonlisted service means the Customer's telephone number is not listed in the directory, but it does appear in the Company's Directory Assistance Records.

The Company is not responsible for any claims made or liability arising from failure to receive calls because of this arrangement.

The Subscriber indemnifies (i.e., promises to reimburse the Company for any amount the Company must pay as a result of) and save the Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the publication of a nonlisted service.

SECTION 5 – MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.9 Carrier Presubscription****5.9.1 General**

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an intraLATA or interLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

SECTION 5 – MISCELLANEOUS SERVICES AND RATES (Cont'd)**5.10 Toll Restriction Service**

Provides for Exchange Access lines or trunks to be restricted from dialing billable toll calls. Directly dialed calls to 700/900 services and operator dialed calls billed to the line are not allowed. This arrangement does allow Calling Card calls, Collect calls, Third Number calls, and direct dialed calls to 911, Directory Assistance and Toll Free services. This service is available where facilities permit.

SECTION 6 - SERVICE DESCRIPTIONS AND RATES (Cont'd)**6.1 DS-1 Service (Cont'd)****6.1.4 Contract Rates – Special Pricing Arrangements (ICB)**

- (A) In lieu of the rates otherwise set forth in this tariff, rates and charges, including minimum usage, installation, special construction and recurring charges for Carrier's services may be established at negotiated rates on an ICB, taking into account the nature of the facilities and services, the costs of construction and operation, the volume of traffic, the length of service commitment by the Customer, and use of facilities by other Customers. Such arrangements shall be considered Special Pricing Arrangements, the terms of which will be set forth in individual Customer contracts. However, unless otherwise specified, the terms, conditions, obligations and regulations set forth in this tariff shall be incorporated into, and become part of, said contract, and shall be binding on Carrier and Customers. Specialized rates or charges will be made available to similarly situated Customers on a non-discriminatory basis. Company will provide notice to the Commission for all Special Pricing Arrangements, including ICB.
- (B) In addition to any rate or charge established by the Carrier, the Customer will also be responsible for any recurring or non-recurring charges imposed by local exchange telephone companies incurred by or on behalf of the Customer in establishing and maintaining service. Such charges may be billed by the Carrier or directly by the local exchange company, at the Carrier's option.

SECTION 6 - SERVICE DESCRIPTIONS AND RATES (Cont'd)**6.1 DS-1 Service (Cont'd)****6.1.4 Mileage Measurements**

- (A) When station locations of a private line service are located in different wire center serving areas, interoffice channel charges apply. Charges are based on the direct airline mileage distance measured between the serving wire centers. Mileage is determined in accordance with the following:
- (1) Obtain the "V" and "H" coordinates for each wire center as listed in the National Exchange Carrier Association Tariff F.C.C. No. 4.
 - (2) Obtain the difference between the "V" coordinates of the two wire centers. Obtain the difference between the "H" coordinates. (The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.
 - (3) Square each difference obtained in 2. preceding.
 - (4) Add the squares of the "V" difference and the "H" difference obtained in 3. preceding.
 - (5) Divided the sum of the squares obtained in 4. preceding by 10.
 - (6) Obtain the square root of the result obtained in 5. preceding. This is the rate distance in miles. (Fractional miles being considered as full miles.)

EXAMPLE: The rate difference is required between City One and City Two.

	<u>V</u>	<u>H</u>
City One	7260	2083
City Two	7364	1865
Difference	104	218
Squared	10,816 +	47,524 = 58,340
	58,340 divided by 10 = 5834	
	Square root of 5834 = 76.38 = 77 Airline Miles	

- (B) For the purpose of applying multipoint charges, the bridging or hubbing locations are determined by that combination of airline distances connecting the service wire center which will produce the lowest interoffice mileage charges. Bridging charges apply when there or more channels connect at the same location.

SECTION 6 - SERVICE DESCRIPTIONS AND RATES (Cont'd)**6.2 DS-1/DS-3 Channel Service****6.2.1 General**

- (A) DS-1/DS-2 Channel Service is an intraLATA fiber optic based, digital service which provides channelization capability for the Customer in the Company's central office. DS-1/DS-3 Channel Service is provided in packages based on systems with DS3 (44.736 Mbps) and DS-1 (1.544 Mbps). It will provide local channels and/or interoffice channels for exchange network access. Foreign Exchange, 1.544 Mbps, and 44.736 Mbps data rates.
- (B) Channelization is provided by DS-1/DS-3 Channel Service Option 1 and 2 Systems and D type channel banks which are offered in various system capacities. DS-1/DS-3 Channel Service Option 1 and 2 Systems furnish fiber optic transport from the central office to a Customer's premises featuring digital 1.544 Mbps (DS1) and/or 44.736 Mbps (DS3) channels as appropriate. The Customer may channelize all or part of a DS-1/DS-3 Channel Service package to activate data facilities for interconnection with the exchange network and data facilities for private line channels, as well as other DS-1/DS-3 Channel Services. The Customer may also choose not to channelize all or part of a DS-1/DS-3 Channel Service package allowing direct connection to other DS3 or DS1 services as provided in this Tariff.
- (C) This service is available within a LATA where appropriate digital facilities can be made available as determined by the Company. Service inquires will be necessary to determine availability interval.
- (D) All DS-1/DS-3 Channel Services in a Customer's package must be channelized in a single equipment location on a Customer's premises, i.e., a package cannot be split between premises, or multiple locations within a premises. Standard network interfaces will be provided by the Company for analog and digital services consistent with existing practices for single channel services.

Features (channels) activated under month-to-month rates will have a minimum service period of one month.
- (G) Additionally, there are some necessary restrictions in total system capacities where certain types of channel services are channelized. The Company will notify the Customer when a system's capacity is affected.
- (H) When the Company provides Customer premises DS-1/DS-3 Channel Service channelization down to a DS1 data rate level it is not necessary for the Customer to provide Channel Service Units (CSU) for associated 1.544 Mbps channels.
- (I) The termination of channelization equipment will be in a single equipment location on a Customer's premises. The Customer must provide suitable floor space, controlled environment, and a source of non-switched 120-volt, 60 HzAC power to support this service. Emergency backup power capability is also available at extra charge on an individual case basis.

SECTION 6 - SERVICE DESCRIPTIONS AND RATES (Cont'd)**6.2 DS-1/DS-3 Channel Service (Cont'd)****6.2.1 General (Cont'd)**

(J) Channelization of DS3 (electrical) data rates on a Customer's premises may also be provided by the Customer. Joint provisioning of channelized services introduces joint responsibilities between the Customer and the Company.

(1) Responsibilities of the Company

- a. The Company will endeavor to activate its portion of joint service in a timely manner on the negotiated date to support installation requirements.
- b. The Company will provide the Customer with information regarding the type and the manufacturer of central office (CO) channelization equipment to be used in each application.
- c. The Company will limit its selection of central office equipment to avoid operational and administrative difficulties associated with a multi-vendor central office environment.
- d. The Company reserves the right to change its equipment vendors should equipment availability, price or technological advantages make such a change attractive or necessary.
- e. The Company will notify the Customer, generally a minimum of six months in advance, of any need to change its central office equipment to allow the Customer sufficient time to respond, make any necessary changes, and schedule cooperative testing for cutover if required.
- f. Digital synchronization timing for DS-1/DS-3 Channel Services will be provided by the Company.

SECTION 6 - SERVICE DESCRIPTIONS AND RATES (Cont'd)**6.2 DS-1/DS-3 Channel Service (Cont'd)****6.2.1 General (Cont'd)**

(J) Cont'd

(2) Responsibilities of the Customer

- a. The Customer must be prepared to activate his portion of joint service in a timely manner on the negotiated date, providing testing equipment and personnel to support installation requirements, as may be necessary.
- b. The Customer will be responsible for selecting his own equipment. Customer equipment must be compatible with the Company provided channelization at the central office.
- c. The Customer must provide suitable power for his own equipment. Simplex powering will not be provided by the Company for a Customer's channel service units due to the serving arrangements associated with fiber optic facilities.

(3) Trouble Resolutions

The Company will assist the Customer in resolving any installation or day to day channel service problems. However, the Company does not assume responsibility for the compatibility or suitability of the Customer's equipment. Dispatches to Customer premises caused by Customer equipment troubles will result in Trouble Location Charges to the Customer.

SECTION 6 - SERVICE DESCRIPTIONS AND RATES (Cont'd)**6.2 DS-1/DS-3 Channel Service (Cont'd)****6.2.1 General (Cont'd)**

- (K) Channelized DS1 service is available only with D4 channel bank equipment or compatible equipment.
- (L) Emerging technology, such as low bit rate voice multiplexing techniques may permit additional quantities of individual channels to be channelized on a single DS1 signal. Equipment providing this capability does not generally assure compatibility between different manufacturers. Some equipment may not be suitable for data transmission or tandem network line application. Rates, charges and availability of this equipment will be negotiated with the Customer on an individual case basis.

6.2.2 Application of Rates

- (A) Monthly rates and charges as specified in Section 6.2.4 following apply for each DS-1/DS-3 Channel Service according to the number of voice grade equivalent channel services capacity in each package. These rates apply per package regardless of the number of circuit equivalents within each package that are actually activated by the Customer at a point in time.
- (B) Exchange network access is provided for channels within each DS-1/DS-3 Channel Service package at the monthly recurring rates as specified in Section 6.2.4 following and apply for each channel within a package that is activated.

SECTION 6 - SERVICE DESCRIPTIONS AND RATES (Cont'd)**6.2 DS-1/DS-3 Channel Service (Cont'd)****6.2.2 Application of Rates (Cont'd)**

- (C) Rates and Charges specified in other tariff sections for services are in addition to the monthly rate for DS-1/DS-3 Channel Services. Also, the rates and charges for other services that may be interconnected or extended beyond the basic DS-1/DS-3 Channel Service, such as off-premises stations, tie lines, private lines, etc., are in addition to the rates specified in this Tariff for those portions of the channel services necessary to provide end-to end service. Rates for single DS1/1.544 Mbps channels used to extend DS-1/DS-3 Channel Services when used as part of the same communications system, will be as otherwise specified in Section 6 of this Tariff.
- (D) DS-1/DS-3 Channel Service Option 1 or 2 Systems are available under contract only for variable rate periods except as modified below. Contract rate increases are subject to the stipulations of F. following. All elements of a contract will expire at the same time (be coterminous).
- (1) DS-1/DS-3 Channel Service Option 1 or 2 Systems are available only under contract as specified preceding.
 - (2) Channelized DS1/1.544 Mbps channels and Sub-DS1 Feature Activations are available under contract or on a month-to-month basis as the Customer's option.
 - (3) Individual exchange network access and private line channel services that are connected to DS-1/DS-3 Channel Service are not offered under DS-1/DS-3 Channel Service master contract provisions. They are subject to their standard tariff provisions as appropriate.

SECTION 6 - SERVICE DESCRIPTIONS AND RATES (Cont'd)**6.2 DS-1/DS-3 Channel Service (Cont'd)****6.2.2 Application of Rates (Cont'd)**

- (E) DS-1/DS-3 Channel Service rates under contract will not be increased by Company initiative until the contract period expires. Those monthly rates for DS-1/DS-3 Channel Service Option 1 or 2 System, Channelization Capacity, facility mileage, and Feature Activation in effect at the time the service is installed and/or as of the service order application date, will be applicable until the contract expires. At the expiration date of the Customer's payment period option, the Customer may select a new payment period option at current contract rates or revert to current rates on a month-to-month basis.
- (F) A Termination Liability Charge is applicable at the date of termination. The applicable charge is dependent on the contract period subscribed to and will be equal to the number of months remaining in the contract times the monthly rates for the DS-1 or DS-3 Channel Service Option 1 or 2 service System, Channelization Capacity, facility mileage, and Feature Activation which are provided under contract, and are subject to the exemptions of F.1. and 2. following.
- (1) No Termination Liability Charge will be applicable for the DS-1/DS-3 Channel Service Option 1 or 2 System or Channelization Capacity when the Customer renegotiates a new contract for the same system at the same location(s) for a period of time greater than the time remaining on the existing contract.
 - (2) The Termination Liability Charge basis for Feature Activation (central office specific channel services plug-in equipment) will be 50 percent of the total monthly rate for the activated features (specific channel units) under contract which are being disconnected. All features activated under contract are coterminous with the basic system with which they are associated. Any features subscribed to on a month-to-month basis have a minimum service period of one month and no associated Termination Liability Charge.
- (G) Transfer of service responsibility between Customers is permitted subject to payment of a Transfer Charge as specified in Section 6.2.4.C.

SECTION 6 - SERVICE DESCRIPTIONS AND RATES (Cont'd)**6.2 DS-1/DS-3 Channel Service (Cont'd)****6.2.3 Digital Architecture and Definitions****(A) Digital Architecture**

- (1) DS-1/DS-3 Channel Services differ in provisioning method and numbering format from single channel services. These services will be available from the Company on a link (partial channel) basis rather than as an end-to-end service. This architecture is intended to promote more efficient connectivity of analog and digital networks in the future.

Many DS-1/DS-3 Channel Service channels will be available on a digital basis at the network interface on a Customer's premises. Both the Company and the Customer have joint responsibilities to ensure the proper transmission of the provided services. Normal analog channel network interface specifications will be superseded by the electrical specifications of the 1.544 Mbps (DS1) channel which is actually terminated. Each DS0 channel provided will have identity only as a "time slot" within a DS1 channel. Compatible digital to analog conversion equipment must be provided by the Customer to derive the desired analog services. Any Channel Service Units (CSUs) necessary for digital services are the responsibility of the Customer.
