NICE Advanced Analytics and VoIP Solutions Implemented at First American Real Estate Tax Service

Will enhance business and call center operational efficiency, service, and increase revenues

Ra`anana, Israel, January 4, 2007 – NICE Systems (NASDAQ: NICE), the global provider of advanced solutions that enable organizations to extract Insight from Interactions(TM) to drive performance, announced today that First American Real Estate Tax Service, the premier provider of real property tax services and information nationwide and a Fortune 500 Company, has chosen NICE Perform(TM), as part of its program to improve customer service, customer loyalty and revenues.

NICE Perform will be integrated into First American`s Cisco Voice over Internet Protocol (VoIP) telephony environment. The solution will help First American improve service and customer retention by developing a deeper understanding of its customers through the use of advanced analytics, which allow users to extract information from contact center interactions and transform it into meaningful insights into customer needs and desires as well as into operational issues throughout the enterprise. The analytics features of NICE Perform will also be used extensively for coaching, training, and quality monitoring purposes, specifically to identify calls where significant issues, phrases, or words are mentioned, or an elevated level of emotion is displayed by either the customer or the contact center agent.

"First American is committed to providing outstanding service to its customers, and implementing NICE Perform will help our tax professionals uphold our high standards of service in an industry where quality service is a major competitive differentiator," said Kyle Eddy, Director of Call Center Operations, First American Real Estate Services. "We feel strongly that by investing in technology such as NICE that will help us better serve our customers, First American will see a great return on that investment in terms of increased customer loyalty and retention."

"By implementing NICE Perform, First American is demonstrating its dedication to putting customers first," said Eran Gorev, President and CEO, NICE Systems Inc. "NICE Perform will help First American provide more effective training to its agents, streamline very complex transactions and processes, and respond to the highly specific and unique demands of the mortgage lending industry."

About First American Real Estate Tax Services

The First American Corporation (NYSE: FAF), a FORTUNE 500 company that traces its history to 1889, is America`s largest provider of business information. First American combines advanced analytics with its vast data resources to supply businesses and consumers with valuable information products to support the major economic events of people`s lives, such as getting a job, renting an apartment, buying a car or house, securing a mortgage and opening or buying a business. The First American Family of Companies, many of which command leading market share positions in their respective industries, operate within five primary business segments, including: Title Insurance and Services, Specialty Insurance, Mortgage Information, Property Information, and Risk Mitigation and Business Solutions. With revenues of \$8.1 billion in 2005, First American has approximately 2,100 offices throughout the United States and abroad. More information about the company and an archive of its press releases can be found at www.firstam.com.

Reliance BPO Selects IEX, a NICE Company, to Supply Workforce Management Solution

Win comes in partnership with Avaya; fast growing India outsourcer selects IEX's TotalView Workforce management system over competing solutions for implementation of up to 10,000 agents

Ra'anana, Israel, and Richardson, Texas, January 8 2007 – NICE Systems (NASDAQ: NICE), the global provider of advanced solutions that enable organizations to extract Insight from Interactions(TM) to drive performance, today announced one of India's fastest growing outsourcers, Reliance Infostreams Pvt. Ltd., branded as Reliance BPO, has selected the IEX's TotalView Workforce Management system from NICE subsidiary, IEX Corporation. IEX TotalView was selected to help Reliance BPO enhance the performance and streamline management of up to 10,000 contact center agents. IEX TotalView was purchased through NICE channel partner, Avaya Global Connect Ltd., after extensive field trials of competing workforce management systems.

The selection by Reliance comes on the heels of the decision recently announced by NICE and Avaya to extend the companies' long-term distribution agreement to include TotalView from IEX.

"We continuously endeavor to enhance our revenue streams and bottom-line by redefining the benchmarks of customer experience and loyalty. Being the interface with our customers, our employees are the key to our success enabling us to reduce costs by improved efficiency," said K Chandra, president of Reliance BPO. "Partnering with IEX for a complete, automated workforce management solution will enable us to enhance our deliverables substantially."

Albert Hainston, head of workforce management and MIS for Reliance BPO added, "The profitability of a contact center is a function of effective workforce utilization, the largest component of direct costs. We believe the IEX solution's superior multiskill simulation and scheduling capabilities, multisite management functionality and Real-Time Adherence feature will enable us to deliver superior value to our customers while increasing business productivity."

Reliance BPO will benefit from the TotalView solution's ability to improve the contact center's scheduling and agent management processes. Reliance BPO will use the solution's patented simulation capabilities to realize the full potential of skills-based routing and multiskill agent efficiencies. The company will also gain unmatched flexibility in determining how and where planning and management is handled within the enterprise. In addition, Reliance BPO will eliminate paper-based time off management processes and facilitate the information exchange between other critical systems such as the payroll system and TotalView.

"We're delighted that Reliance BPO has joined the growing number of IEX customers in India, and how quickly our new distribution relationship with NICE partner Avaya has translated into business," said Debbie May, president of IEX, which has been named the India Workforce Management Software Market Leader by Frost & Sullivan for the second consecutive year. "Reliance BPO's decision to purchase TotalView is a testament to our ability to meet the unique staff planning requirements of contact centers around the world."

Reliance BPO will also benefit from the TotalView solution's capability to support a number of scheduling scenarios designed to meet the unique needs of the India market: Team Scheduling and Seat Limit Scheduling. Team Scheduling will enable them to establish flexible start and end times for each shift. Seat Limit Scheduling will enable Reliance BPO to establish minimum and maximum seating parameters. This will prevent the center from scheduling more agents than there are seats available, and will enable the organization to establish minimum staffing levels for periods of low contact volume.

About Reliance BPO

Reliance BPO a constituent of Reliance – Anil Dhirubhai Ambani Group, launched its BPO services in 2002. Since then the company is one of the fastest growing BPOs, catering to a wide range of clientele including India's largest private sector Information and communications company, a non banking financial services company and India's largest integrated private sector power utility company, among other national & international businesses from telecom and banking verticals. The Reliance ADA group is among India's top three private sector business houses on all major financial parameters with a market capitalization of US \$ 22 billion, net assets in excess of US \$ 7 billion and net worth to the tune of US \$ 6 billion. NICE Receives 7–digit Order for Site Safety and Security Solution for Bangkok`s new International Airport

NICE provides advanced, integrated, open, video capture solution across multiple sites

Ra`anana, Israel, January 10, 2007 – NICE Systems (NASDAQ: NICE), the global provider of advanced solutions that enable organizations to extract Insight from Interactions(TM) to drive performance, today announced that it has received a 7–digit order for its advanced video recording solutions from Bangkok`s new international airport, Suvarnabhumi Airport, Thailand.

This new airport was opened in September 2006, and includes the world's largest control tower (132.2m or 434 feet), and the world`s second largest single building terminal I (563,000 m² or over 6 million ft²). As part of its security infrastructure, the airport authorities purchased NiceVision Network Video IP recorders, through NICE business partner Vision & Security System (VSS), who implemented an integrated IP CCTV video system as part of a contract with main contractors Smart Comtech. The NICE solution is currently installed in five sites within the airport complex.

"We chose NICE because it is the leader in IP video solutions, is committed to the state–of–the–art technology that we need in this state–of–the–art airport," said Mr Somchai Sawasdeepon of Suvarnabhumi Airport. We were deeply impressed by NICE`s proven, world–class R&D., and the company`s previous successful experience in implementing these solutions in other major airports and similar large–scale sites."

"Bangkok International Airport is the newest and one of the largest in the world," said Eytan Gilboa, Director of NiceVision Sales in the APAC region. "We`re very excited to have been selected for this important project and we look forward to helping provide this amazing new airport with an outstanding solution based on NICE`s advanced video technology."

About Airports of Thailand (AOT)

At present, Thailand has a total of 28 commercial airports; seven of which are international and 21 are domestic. Apart from five of the aforementioned airports under the AOT`s administration, the rest are under the administration of The Department of Aviation, Ministry of Transport .

The five airports under AOT are Bangkok International Airport, Chiang Mai International Airport, Hat Yai International Airport, Phuket International Airport and Chiang Rai International Airport.

These airports under the AOTs administration are the gateways to Thailand, and their performances show a continuously increase in passenger and cargo. In 1999, the airports accommodated 33,520,593 passengers, 215,647 flights and 823,476 tons of air cargo, or 85% of the country's total traffic figures.

NICE Digital Video Surveillance Solution Selected by Ronald Reagan Washington National Airport

Ra`anana, Israel, January 29, 2007 – NICE Systems (NASDAQ: NICE), the global provider of advanced solutions that enable organizations to extract Insight from Interactions(TM) to drive performance, today announced it has been selected by the Metropolitan Washington Airports Authority (MWAA) to supply NICE`s NiceVision® Digital Video Surveillance Solution as part of a CCTV core systems upgrade for the Ronald Reagan Washington National Airport.

Gunvir Baveja, President and CEO of eVigilant, system integrators for Reagan National comments on the project, "As an integrator for a project of this scope, we have to provide high levels of security without interrupting or slowing passenger flow. Because NICE has been providing security surveillance systems for airports around the world for years, they allow us to meet these challenges and provide our client with the best suited digital video technologies available."

The airports` planned security system enhancement involves the decommissioning and removal of an existing video server and recording system currently maintained in the airport operations computer room. The old system is currently being replaced with new NICE high-resolution digital video recorders capable of sustaining numerous cameras and providing the infrastructure and integration potential to support video content applications for real-time threat detection and analysis. NiceVision`s open architecture platform provides a safe and easy-to-manage operating environment, which easily integrates with any supplementary security and communication systems.

"We are very pleased to be selected for this high level airport security project," said Ian Ehrenberg, vice president and general manager of NiceVision. "We are currently deployed at a large number of airport facilities and are rapidly becoming the preferred choice for both the operative and directive levels. The continuing preference of NICE by this market is a testimony to the quality of our products and the reputation of our company."

About NICE

NICE Systems (NASDAQ: NICE) is the leading provider of Insight from Interactions(TM) solutions, based on advanced analytics of unstructured multimedia content – from telephony, web, radio and video communications.
