NICE Receives Market Leadership Award, Named Industry Leader by Top Industry Analyst Firms

Ra'anana, Israel, October 03, 2007 - NICE Systems (NASDAQ: NICE), the global provider of advanced solutions that enable organizations to extract Insight from Interactions, today announced that NICE is the recipient of the prestigious 2007 Market Leadership Award for excellence in North American contact center quality management solutions from independent analyst firm Frost & Sullivan, which cited the company as number one in its influential industry report. The company also announced that Gartner, leading provider of research and analysis on the global information technology industry, has rated the company 'strong positive' - its highest rating possible - in two recent reports, "MarketScope for Contact Center Quality Management" and "MarketScope for Contact Center Workforce Management."⁽¹⁾ The reports cover NICE Perform and IEX TotalView Workforce Management system, which are part of the NICE SmartCenter solution.

Recent reports recognize NICE as follows:

- Frost & Sullivan: quality management market share leader for the fifth consecutive year; workforce management: market share leader by product revenue;
- Gartner: 'strong positive', highest rating possible regarding both contact center quality management and contact center workforce management.

The market share rankings from Frost & Sullivan are based on 2006 product non-GAAP revenues. In addition, NICE non-GAAP revenues in the enterprise market have increased at more than 41% from the first half of 2006 to the first half of 2007.

Keith Dawson, senior analyst at Frost & Sullivan said, "The combination of best-in-class solutions within the NICE SmartCenter offering will help businesses turn raw contact center data into prescriptions for better agent behavior and customer service. NICE SmartCenter enables contact centers to provide the organization with an interpretation of the different kinds of data analyses of customer interactions instead of just reporting them. It provides insight that marketing, legal, compliance, finance and others can use to help understand what's going on in the contact center. It is clear that NICE remains committed to providing its customers with top-shelf technology and the analytic tools necessary to make sense of contact center activities. We are pleased to recognize NICE Systems as a market leader."

In its report, Frost & Sullivan also took note of NICE's IEX TotalView Workforce Management system and its "powerful scheduling algorithms with discrete simulation technology to generate staff plans that take into account site and network routing rules as well as individual agent skills, skill levels, work preferences and availability."

"We are happy to see recognition of our ongoing market leadership and of our strategy for providing the high performance contact center and enterprise with capabilities for improving performance at the agent, operational and enterprise levels," said Zvi Baum, NICE President of Enterprise Interactions Solutions. "We are excited that the power and uniqueness of NICE SmartCenter are being recognized by industry thought leaders."

(1) Gartner Inc., "MarketScope for Contact Center Quality Management, 2007" by Jim Davies, September 14, 2007; and "MarketScope for Contact Center Workforce Management, 2007" by Jim Davies, 16 July 2007.

* The MarketScopes are copyrighted April and July 2007 Gartner, Inc. and are reused with permission. The MarketScope is an evaluation of a marketplace at and for a specific time period. It depicts Gartner's analysis of how certain vendors measure against criteria for that marketplace, as defined by Gartner. Gartner does not endorse any vendor, product or service depicted in the MarketScope, and does not advise technology users to select only those vendors with the highest rating. Actimize to Provide Crédit Agricole Asset Management with Industry-Leading Brokerage Compliance Market Abuse and Anti-Money Laundering Solutions

NEW YORK & LONDON – October 9, 2007 - A software solution to prevent financial fraud and market abuse from Actimize, a leading provider of transactional risk management software for the financial services industry and a NICE Systems (NASDAQ: NICE) company, has been selected by Crédit Agricole Asset Management (CAAM) in order to strengthen its ability to detect behaviour that could be interpreted as questionable and potentially considered as market abuse. CAAM has also selected an Actimize Anti-Money Laundering (AML) solution – a comprehensive solution for monitoring suspicious activity, which includes both an investigative case management function for flux analysis and global watch list monitoring. This agreement signed between CAAM and Actimize covers France and CAAM's European subsidiaries.

"CAAM takes regulatory compliance very seriously," says Marie-Madeleine Galindo, CAAM Project Manager. "We were seeking an AML and market abuse software solution to help strengthen our worldwide reputation and to put into practice an approach which is centred on managing risk in our business. We chose Actimize because these two software solutions can be implemented rapidly and because Actimize has a very good international reputation."

"This is a significant win for Actimize, which reinforces our portfolio of prestigious clients," says Bruno Piers de Raveschoot, director of Actimize Europe. "We are very excited to be providing a solution that meets CAAM's risk and market abuse requirements, bringing the required infrastructure for an overall strategy to fight financial crime and money-laundering. We are seeing a tremendous interest from asset managers worldwide wishing to deploy a robust and proven solution to combat money laundering and enforce the new regulations around market

abuse. We are confident in our ability to offer innovative solutions with real competitive advantages."

About Crédit Agricole Asset Management Group (CAAM Group):

Crédit Agricole Asset Management Group is Crédit Agricole Group's asset management subsidiary. With € 565.7 billion of assets under management at 30 June 2007, CAAM Group is the 5th largest asset management company within Continental Europe*. CAAM Group's subsidiaries offer a complete line of investment products for:

- The regional banking networks of Crédit Agricole, LCL and the international retail banking subsidiaries of Crédit Agricole group and,
- Institutional investors, large corporate accounts and third-party distributors in France and abroad.

Crédit Agricole Asset Management Group is active in 22 countries (Europe, Asia-Pacific, North America, the Middle East and North Africa).

**IPE - Top 400 European Asset Management Leaders, data as at Dec. 2006, issued in June 2007*

Insight from Interactions™

China's Shanghai Pudong International Airport Places a 7-Digit Order for NICE's IP-based Video Solution with Content Analytics

To enhance safety and security of tens of millions passengers per year

Ra'anana, Israel, October 10, 2007 - NICE Systems Ltd. (NASDAQ: NICE), a leading global provider of advanced solutions that enable organizations to extract Insight from Interactions to drive performance, today announced that Shanghai Pudong International Airport has placed a 7-digit order to provide its IP-based video solution with content analytics. Shanghai Pudong Airport will use the NICE solution to enhance the safety and security for a capacity of tens of millions passengers per year.

Located in the eastern part of Pudong district of Shanghai, China, Shanghai Pudong International Airport is a major international gateway into China, handling more than 17 million passengers on international flights in 2006. The airport is planning to increase its capacity with a total of three terminals, two satellite halls and five parallel runways, for a final capacity of 80 million passengers per year.

In selecting NICE's solution Shanghai Pudong Airport will benefit from an advanced IP video security solution with real time event management, and high level of redundancy, for remotely monitoring and managing activities throughout the airport campus. NICE's solution constitutes an open IP video platform with a high-availability architecture, supported by unique features, to ensure non-stop surveillance under any condition for mission critical applications.

To ensure the safety and security of increased capacity Pudong will also apply NICE's capabilities for simultaneous advanced video content analytics to give its site managers the power to identify risk in real time, make optimal decisions, and take action that improves security efficiency. The NICE solution will enable Pudong with real-time threat detection capabilities, including automatic detection of unauthorized entry into secured areas, counting the number of people across multiple entries/exits, with trends analysis, and detection of illegally parked vehicles. Furthermore, Pudong will be able to benefit from the open distributed IP architecture of NICE's solution, which is ideal for both distributed and centralized sites and leverages IP networks.

"We are very excited to be a part of this important project and deliver Insight from Interactions to help increase the security of Shanghai's important airport," said Doron Ben Sira, President of NICE APAC. "This win is another confirmation of NICE's value proposition in offering airport security with advanced IP-based, video content analytics to the world's major airports."

A Leading French Investment Bank is First to Add Actimize Transaction Reporting to Comply with New MiFID Regulations

Actimize's Extensive Involvement in MiFID Research and Flexible Solutions makes it Best Fit for Large Banks Seeking Rapid Implementations

Paris & London – October 17, 2007 – Actimize, the leading provider of transactional risk management software for the financial services industry and a NICE Systems (NASDAQ:NICE) company, today announced that a leading French investment bank has selected the Actimize MiFID Transaction Reporting Solution. The bank, an existing Anti-Money Laundering client, will use the new Actimize solution to comply with the obligations that will be imposed by the Markets in Financial Instruments Directive (MiFID). The solution will be put in place to monitor all of the bank's financial instruments transactions processed in the French market.

Actimize MiFID Transaction Reporting is one of the Actimize MiFID brokerage compliance offerings introduced in May 2007. Other offerings include Client Classification and Suitability, Best Execution Compliance, Client Order Handling Surveillance and Conflicts of Interest Surveillance. All MiFID offerings share the same analytical engine and the Actimize Case Manager software for workflow and investigation processes.

With the MiFID effective date approaching, financial institutions are racing to implement internal changes that will allow them to continue to provide services across borders and maintain branches in various European Union states. To comply with MiFID, businesses are required to have procedures in place to report details of all transactions in instruments traded on a regulated market to the competent authority. This creates a particular challenge for many financial institutions, as they need to meet the new requirements of more than one national regulator.

Actimize is drawing on its expertise and knowledge of the financial markets and its intensive work with various financial institutions in Europe to provide firms with a robust and scalable solution to meet the new regulations.

The Actimize MiFID Transaction Reporting software monitors a firm's trade reporting obligations and alerts the compliance and supervisory personnel of potential violations. The solution also allows firms to comply with the intra-day reporting requirements by providing real-time alerts to the desk supervisor in the event of missing or incorrect trade reports before the day is past. Alerts are generated for transactions that were not reported, not reported on a timely basis, and/or not correctly reported. Alerts are scored, based on transaction size, the time delay in the trade report and the prior alert history of the trader and the security. The scenarios can be configured for each Reporting Authority, MTF or Exchange.

"When it comes to transaction reporting, financial institutions need to have confidence in the quality of the solution they are using," says Bruno Piers de Raveschoot, Director of Actimize Europe. "Our heavy involvement in MiFID from a research and planning perspective has helped us to better understand the needs of the industry and bring to market a comprehensive suite of enterprise-wide offerings that can help firms effectively meet their compliance obligations."

About Actimize

Mitigating transactional risk across enterprise silos, Actimize is a leading provider of software solutions for anti-money laundering, brokerage compliance and fraud prevention. Built on a patented, scalable and extensible analytics platform, Actimize solutions enable financial institutions to increase their insight into real-time customer behavior and improve risk and compliance performance. Six of the top 10 global banks and eight of the top 10 U.S. brokerages use Actimize solutions to process hundreds of millions of transactions a day. Actimize, a NICE Systems (NASDAQ: NICE) company, has offices in New York, Israel, London and Tokyo. For more information, go to www.actimize.com.

Insight from Interactions™

Leading UK Provider of Debt Collection Services, Fredrickson International Selects NICE Perform Adaptive Interaction Analytics

NICE Perform, part of NICE SmartCenter, to help improve rate of collections, customer satisfaction, and operational efficiency

Ra'anana, Israel, October 30, 2007 - NICE Systems Ltd. (NASDAQ: NICE), a leading global provider of advanced solutions that enable organizations to extract Insight from Interactions to drive performance, today announced that UK's Fredrickson International, a leading provider of debt collection services, has selected NICE Perform's adaptive interaction analytics, part of the NICE SmartCenter solution, for deployment in its contact center's VoIP environment through its business partner Azzurri Communications, a leading managed services company delivering flexible voice, data and mobile communications. NICE Perform will help Fredrickson increase rate of collections, improve customer satisfaction, and enhance operational efficiency.

Fredrickson International selected adaptive interaction analytics from NICE Perform to help improve its capabilities in collecting consumer and commercial debt on behalf of their clients, which include some of the largest financial institutions and corporations in the UK, many of which are listed on the FTSE 100 (Financial Times Stock Exchange).

The NICE solution will enable Frederickson to hone in on specific customer interactions relating to strategic company goals such as increasing agents' ability to locate and speak to the right party in order to increase the chances of getting a payment, promise-to-pay or some type of action on the account. NICE Perform adaptive interaction analytics will enable Frederickson to better understand how agent behavior impacts the rate of collections, and create customized coaching packages for improving their capabilities in locating debtors quickly and easily, and fine-tuning soft-skills and negotiation skills, to optimize collections on behalf of its clients and increase revenues.

"The adaptive interaction analytics capabilities of NICE Perform will be a cornerstone in our strategy to maximize the speed and amount of recovery," said Paul Butler, Collections Director, Fredrickson International. "Collecting for both consumer credit and commercial debt requires specific, advanced skill sets. We are excited about how NICE can help us better understand what lies behind our agents' performance levels and how we can improve upon that performance to increase our rate of collections."

Adaptive interaction analytics from NICE harness the power of interaction analytics with an automated, iterative, system self-learning solution. Adaptive Interaction Analytics provides a very high degree of accuracy and efficiency in a scalable solution that analyzes 100 percent of the interactions in a cost-effective manner. This capability leverages customer interactions to proactively identify trends, anticipate opportunities, adjust processes to meet business objectives and take action at the right-time.

"We are very happy to have been selected by Fredrickson, reflecting our growing success in enabling financial services organizations to improve their collections capabilities," said Barak Eilam, VP and General Manager, Interaction Analytics at NICE. "This win also reflects that our adaptive interaction analytics is the premier choice for better understanding customer behavior and its impact on the bottom line."

NICE SmartCenter

NICE SmartCenter provides organizations with capabilities to improve performance at the agent, operational and enterprise levels. The solution drives contact center and enterprise performance by leveraging the synergies of the combined capabilities of NICE's offering for interactions capture, quality management, interaction analytics, workforce management, performance management, coaching, and customer feedback; each the leading solution in its category, unified within a Service-Oriented Architecture (SOA) framework, providing powerful functionality with maximum flexibility.

About Fredrickson

Fredrickson International is one of the leading debt collection agencies in the UK, specializing in consumer credit collection, commercial debt collection, providing litigation, debt sale and purchasing, and technology services, and operating on behalf of some of the largest financial institutions and corporations in the UK, many of whom are listed on the FTSE 100 (Financial Times Stock Exchange Authority). More information can be found at www.fredricksoninternational.co.uk.
