NICE Actimize Solutions Selected by Hancock Bank to Provide Financial Crime Protection

Growing regional bank standardizes on NICE Actimize's fraud and anti-money laundering solutions to 'future proof' its technology roadmap

NEW YORK – October 3, 2011 – NICE Actimize, a NICE Systems (NASDAQ: NICE) company and the largest and broadest provider of a single financial crime, risk and compliance software platform for the financial services industry, announced that the Gulf Coast's Hancock Bank is implementing NICE Actimize's anti-money laundering, fraud prevention and enterprise risk case management solutions. The bank decided upon a single-vendor selection to "future proof" its technology roadmap during a period of rapid growth for the bank.

Hancock Bank's deployment of NICE Actimize's solutions will address online ACH (Automated Clearing House) and wire fraud issues, working to stop losses before they occur. The firm's anti-money laundering solutions will also support customer onboarding and provide sanctions screening and suspicious activity monitoring for the bank. A cross-channel approach to fighting financial crime is becoming increasingly more common for mid-tier financial institutions as they move toward developing consolidated financial crime strategies to decrease costs and improve effectiveness.

"It was key for us to select a vendor who would enable us to future proof our technology roadmap," said Jeff Theiler, Senior Risk Officer, Hancock Bank. "We are confident in NICE Actimize's demonstrated market leadership and proven ability to implement its solutions quickly and effectively to address our immediate needs, which include the operational integration of our recent Whitney acquisition, as well as support our anticipated rapid growth. These factors were critical in our decision to standardize on NICE Actimize's financial crime platform and solutions."

"NICE Actimize is very familiar with the unique fraud and money laundering challenges that mid-sized financial institutions face," said Amir Orad, President and CEO of NICE Actimize. "More than a decade of experience with well-established and growing banks allows NICE Actimize to effectively provide the breadth and depth of expertise and scalability Hancock Bank will need as it continues to expand its footprint."

Hancock Holding Company/Hancock Bank

With assets of approximately \$20 billion, Hancock Holding Company, Inc., (NASDAQ: HBHC) is the parent company of Hancock Bank and Whitney Bank, institutions founded more than a century ago on ideals of *Honor & Integrity, Strength & Stability, Commitment to Service, Teamwork, and Personal Responsibility*.

The company operates almost 300 full-service bank branches and nearly 400 ATMs across a Gulf South corridor spanning South Mississippi; southern Alabama; south central Louisiana; the northern, central, and Panhandle regions of Florida; and metropolitan Houston, Texas. The Hancock Holding Company financial services family also includes Hancock Investment Services, Inc.; Hancock Insurance Agency and its divisions of J. Everett Eaves and Ross King Walker; Magna Insurance Company; Southern Coastal Insurance Agency, Inc.; corporate trust offices in Gulfport and Jackson, Miss., New Orleans and Baton Rouge, La., and Orlando, Fla.; and Harrison Finance Company. Investors and customers can access more information about Hancock Holding Company, Hancock Bank, and e-Banking at www.hancockbank.com. Details about Whitney Bank and online banking are available at www.whitneybank.com

NICE Actimize, a NICE Systems company, is the world's largest and broadest financial crime, risk and compliance solutions provider. The company provides real-time and cross-channel fraud prevention, anti-money laundering, enterprise investigations, risk management and trading surveillance solutions built upon a single flexible software platform. Implemented by the majority of the world's largest financial institutions, including all of the top 10 banks, the company's solutions enable clients to mitigate financial crime risk, improve compliance, and reduce operational costs. www.actimize.com.

About NICE Systems

NICE Systems (NASDAQ: NICE) is the worldwide leader of intent-based solutions that capture and analyze interactions and transactions, realize intent, and extract and leverage insights to deliver impact in real time. Driven by cross-channel and multi-sensor analytics, NICE solutions enable organizations to improve business performance, increase operational efficiency, prevent financial crime, ensure compliance, and enhance safety and security. NICE serves over 25,000 organizations in the enterprise and security sectors, representing a variety of sizes and industries in more than 150 countries, and including over 80 of the Fortune 100 companies. www.nice.com.

**NICE and Intrado Announce the Expansion of their Partnership
with a Value Added Distributor Agreement and Integration of
NG9-1-1 Solutions**

Ra'anana, Israel, October 11, 2011 - NICE Systems Ltd. (NASDAQ: NICE), today announced that it has expanded its partnership with Intrado Inc., a subsidiary of West Corporation and a leading provider of 9-1-1 technology solutions, by entering into a distribution agreement with Intrado's call handling business. Under the agreement, Intrado will offer NICE public safety solutions and services to Intrado customers in the continental U.S. and Canada, enabling PSAPs (Public Safety Answering Points) to take advantage of next-generation 9-1-1 (NG9-1-1) ready solutions, such as native VoIP recording and NICE Inform for multimedia incident information management. The distribution agreement was signed earlier this year.

The two companies also completed an integration of the NICE audio recording solution with Intrado's next-generation VoIP E9-1-1 controller called Positron VIPER®. The integration of the two products means PSAPs can now implement a tested, proven NG9-1-1-ready solution for recording Internet Protocol (IP) communications. Additionally, because the integrated solution records native IP, PSAPs can achieve very high audio recording quality while eliminating analog wiring infrastructure costs associated with station side analog recording. VIPER enables PSAPs to support NG9-1-1 services such as text messages, pictures, video and other data. VIPER's networking architecture relies solely on IP connectivity and was engineered to support NENA's i3 next generation IP standards for native VoIP 9-1-1 calls.

"NICE and Intrado are both at the forefront of NG9-1-1 in their respective fields and our companies already enjoyed a successful partnership, with NICE joining the Intrado A9-1-1SM Alliance Member Program last year," said Eric Hines, VP Security, NICE Systems. "We are excited to build on our relationship with Intrado through this agreement and by integrating our next generation of solutions for managing and recording IP communications."

"As PSAPs continue to transition to IP networks, the shape of public safety communications will continue to evolve," said Joe Hernandez, senior vice president for Intrado. "PSAPs will need solutions that have the ability to capture and manage many new forms of multimedia data and IP-based emergency communications. Our partnership with NICE better equips us to address these growing customer needs."

About Intrado

In business for more than 30 years, Intrado, a subsidiary of West Corporation, has maintained a focus and passion for saving lives and supporting the needs of public safety. Agencies and telecommunication services providers throughout the world depend on Intrado for emergency communication services and technology. Intrado's dedicated focus on emergency communications technology allows the company to continue pioneering network innovations that improve emergency response. For more information, visit www.intrado.com. You can also follow us on Facebook and Twitter for the latest news.

Forward-Looking Statements

This press release contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such forward-looking statements, including the statements by Messer Hines, are based on the current expectations of the management of NICE-Systems Ltd. (the Company) only, and are subject to a number of risks and uncertainties that could cause the actual results or performance of the Company to differ materially from those described herein, including but not limited to the impact of the global economic environment on the Company's customer base (particularly financial services firms) and the resulting uncertainties; changes in technology and market requirements; decline in demand for the Company's products; inability to timely develop and introduce new technologies, products and applications; difficulties or delays in absorbing and integrating acquired operations, products, technologies and personnel; loss of market share; pressure on pricing resulting from competition; and inability to maintain certain marketing and distribution arrangements. For a more detailed description of the risk factors and uncertainties affecting the company, refer to the Company's reports filed from time to time with the Securities and Exchange Commission, including the Company's Annual Report on Form 20-F. The forward-looking statements contained in this press release are made as of the date of this press release, and the Company undertakes no obligation to update or revise them, except as required by law.

**NICE Recognized with a Security Technology Executive Magazine
Innovation Award for Louis Armstrong New Orleans International
Airport PSIM Implementation**

STE Innovation Awards honor the best and most unique applications of security technology in the U.S.

RA'ANANA, ISRAEL, October 24, 2011 NICE Systems Ltd. (NASDAQ: NICE) today announced that it has been recognized as an honorable mention winner in the *Security Technology Executive (STE)* Magazine Innovation Awards for its work on the Louis Armstrong New Orleans International Airport PSIM implementation. NICE was recognized, along with Armstrong International Airport and system integrator Johnson Controls, for their innovative implementation of NICE Situator, NICE's open situation management solution.

Now in its seventh year, the *STE* Innovation Awards honors the best and most unique applications of security technology in the United States. This year's winning projects were hand-picked by a panel of security industry experts from among dozens of entries.

"The entrants in this year's competition spanned a vast spectrum of projects," said *STE* publisher/editor-in-chief Steve Lasky. "While each had their merits, Armstrong International Airport's innovative use of situation management technology (PSIM) won the judges over for its ability to consolidate diverse systems, and deliver real-life ROI and physical security benefits."

"The deployment of NICE Situator at Armstrong International Airport illustrates how airports can use situation management in innovative ways to make the most of their existing technology investments, and enhance safety and security," said Yaron Tchwell, President, NICE Security Group and EVP Business Operations. "We are honored to be recognized for our work on this implementation, in partnership with the Airport and Johnson Controls."

To enhance safety and security for the more than eight million passengers each year, Armstrong International Airport employs numerous security and life safety systems. "We have a lot of different stove pipes of information – video, access control, fire alarms, computer aided dispatch (CAD), Voice over IP (VoIP), and automated external defibrillator (AED) alarms – which can make it difficult to form an overall picture," explained John Lyon, telecommunications manager for the Airport's Security Operations Center. "NICE Situator consolidates these systems into a unified view, with real-time correlation and alerts, so our dispatchers get a much clearer real-time picture of situations. They can do 95 percent of their work using just two NICE Situator screens."

The Airport was also able to incorporate within NICE Situator over 90 standard operating procedures for different security, fire, EMS, and weather scenarios, replacing previously used flat electronic forms. Processes implemented in NICE Situator are interactive and adaptive, and can integrate automated or operator-initiated actions, dynamically proceeding down different response paths based on pre-defined conditions.

Referring to the ability to view evolving situations in a geographic context through NICE Situator, Lyon concludes: "To be able to see a map of the facility and visualize where something's happening as it's happening, and drill down into layers of information, like building plans and video, is very empowering."

The NICE Security Offering addresses the needs of governments and enterprises with intent-based solutions for fighting crime and terror, by anticipating, managing and mitigating safety, security and operational risks. The offering enables capturing, analysis and correlation of data from multiple sensors and systems, including audio, video, radio, geo-location and web, providing a framework for fusing data silos into a single, holistic operational view. NICE Security solutions empower organizations to act effectively in real time to prevent, manage and investigate incidents, ensuring fast resolution and debriefing, and continuous security improvements. NICE Security solutions are deployed worldwide in transportation systems, critical infrastructures, city centers and enterprise campuses.

About NICE Systems

NICE Systems (NASDAQ: NICE), is the worldwide leader of intent-based solutions that capture and analyze interactions and transactions, realize intent, and extract and leverage insights to deliver impact in real time. Driven by cross-channel and multi-sensor analytics, NICE solutions enable organizations to improve business performance, increase operational efficiency, prevent financial crime, ensure compliance, and enhance safety and security. NICE serves over 25,000 organizations in the enterprise and security sectors, representing a variety of sizes and industries in more than 150 countries, and including over 80 of the Fortune 100 companies. www.nice.com.

About Louis Armstrong New Orleans International Airport

Louis Armstrong New Orleans International Airport is a public use airport in Jefferson Parish, Louisiana, United States. It is owned by the City of New Orleans and is located 10 nautical miles (19 km) west of its central business district. It is the primary commercial airport for the New Orleans metropolitan area and southeast Louisiana and in 2010 served a total of 8.2 million passengers. Armstrong International Airport has four concourses and two terminals, East and West, connected by a central ticketing alley. The Airport is governed by the New Orleans Aviation Board, which was created in 1943 to oversee the Airport's administration, operation, and maintenance. The Board represents the City in all aviation matters in consultation with state, national, and international government agencies. All members of the Board are appointed by the Mayor of New Orleans with the approval of the City Council. More info at <http://www.flymsy.com/>

Forward-Looking Statements

This press release contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such forward-looking statements, including the statements by Messer Tchwellia, are based on the current expectations of the management of NICE-Systems Ltd. (the Company) only, and are subject to a number of risks and uncertainties that could cause the actual results or performance of the Company to differ materially from those described herein, including but not limited to the impact of the global economic environment on the Company's customer base (particularly financial services firms) and the resulting uncertainties; changes in technology and market requirements; decline in demand for the Company's products; inability to timely develop and introduce new technologies, products and applications; difficulties or delays in absorbing and integrating acquired operations, products, technologies and personnel; loss of market share; pressure on pricing resulting from competition; and inability to maintain certain marketing and distribution arrangements. For a more detailed description of the risk factors and uncertainties affecting the company, refer to the Company's reports filed from time to time with the Securities and Exchange Commission, including the Company's Annual Report on Form 20-F. The forward-looking statements contained in this press release are made as of the date of this press release, and the Company undertakes no obligation to update or revise them, except as required by law.

**NICE Customer The Standard Named Among 1to1 Magazine's 2011
Customer Champion Honorees for Capturing the 'Voice of the
Customer' and Improving Customer Experience**

Ra'anana, Israel, October 26, 2011 - NICE (NASDAQ: NICE), today announced that, as a result of a successful strategic initiative that included the deployment of NICE solutions, Mr. David Payne, Assistant Vice President, Contact Center at The Standard, has been named as a 1to1 Magazine 2011 Customer Champion. Mr. Payne received the honor for having leveraged the voice of the customer for improving customer experience and employee performance. The Standard is a marketing name for StanCorp Financial Group, Inc. and subsidiaries. The Standard, a leading provider of financial products and services, is utilizing NICE business solutions as part of its initiative to improve customer experience by gaining a better understanding of the intent of customer, improving customer satisfaction, increasing employee engagement and performance, and increasing contact center operational efficiency.

Ginger Conlon, Editorial Director at 1to1 Magazine said, "We congratulate David Payne for being named a 2011 1to1 Customer Champion. We recognize Mr. Payne for being an executive who is the voice of the customer in his organization. Mr. Payne earned this award for engaging his team in a way that helps to build both employee and customer loyalty, for promoting a customer-centric approach to business, and for his efforts to help The Standard tie customer strategy to bottom-line impact."

David Payne said, "I am honored to be the recipient of this award. This recognition is a reflection of the great efforts that the employees I represent have made in improving customer experience and of the valuable support we have received from our executive leadership. We sought an understanding of customer needs, wants, and intent, and launched a comprehensive initiative to 'hear' the voice of the customer in order to achieve these goals. By focusing on developing our people, streamlining our processes and improving our technology, we have achieved remarkable results in identifying contributors to customer dissatisfaction and taking steps to correct issues and improve overall customer experience."

The Standard leveraged NICE products including call recording, quality management, customer feedback, and workforce management. With these solutions in place, the company can make sure that the right agent with the right skills handles calls that are best suited for that individual. Supervisors also have more time for training, coaching and development, with the automation of much of the administrative work. As a result, agents are more engaged and achieve higher satisfaction scores.

Mr. Yochai Rozenblat, President and CEO of NICE Americas said, "We are proud to be a part of the customer-centric achievements that have earned Mr. Payne the 1to1 Magazine 2011 Customer Champion honor. He has been uniquely innovative in creating an environment for employees that drives customer satisfaction, and I strongly believe that this reflects the vision and spirit at NICE."

Each year, 1to1 Magazine selects 1to1 Customer Champions from among dozens of applicants. These are customer-centric leaders who understand that engaged customers make a positive bottom-line impact. They are innovative, determined, and creative leaders who treat customers as the valuable resource they are. Their stories are featured in a special issue of 1to1 Magazine's Weekly Digest in October. To read the stories online go to <http://www.1to1media.com/view.aspx?docid=33174>.

About The Standard

The Standard is a leading provider of financial products and services, including group and individual disability insurance, group life, AD&D, dental and vision insurance, retirement plans products and services, individual annuities and investment advice.

NICE's Enterprise Offering enables organizations to impact every customer interaction with targeted solutions for enhancing the customer experience, increasing service-to-sales revenue, streamlining operational efficiency, and complying to policies and regulations. Driven by real-time, cross-channel analytics – including speech analytics, text analytics, feedback analytics, web, and social media analytics – and coupled with real-time decisioning and guidance, NICE Enterprise solutions are implemented by contact centers of all sizes, branch networks, retail stores, trading floors, and back office operations.

The Standard is a marketing name for StanCorp Financial Group, Inc. and subsidiaries. For more information about The Standard, visit www.standard.com.

***NICE Actimize positioned highest in both "Market Share Potential" and
"Completeness of Offering" in Chartis' 2011 Financial Crime Risk Management
report***

New York – October 27, 2011 – NICE Actimize, a NICE (NASDAQ:NICE) company and one of the industry's largest and broadest providers of a single financial crime, risk and compliance software platform for the financial services industry, today announced that Chartis Research has recognized NICE Actimize as an industry leader in financial crime risk management technology in the recently released report "Financial Crime Risk Management 2011."

Chartis provides research and analysis on the global market for risk management technology. According to the firm, financial crime is on the rise and losses due to fraudulent behavior are growing. Over the next few years, financial institutions around the world will be making strategic investments in solutions to combat financial crime risk. Because of this demand, Chartis forecasts that the global market for financial crime risk management technology will grow to \$4.3 billion by 2013.

Among other observations in the report, Chartis notes that new regulatory requirements are especially focused around anti-money laundering and anti-fraud measures, with more initiatives expected to follow. Chartis states that from a financial crime solution standpoint, "winning solutions will incorporate features such as integrated AML/anti-fraud platforms and centralized management and reporting systems, as well as real time transaction monitoring."

"Banks are committed to managing financial crime risk, which means working across their many business channels to minimize fraudsters' movement between them," said Peyman Mestchian, Managing Partner at Chartis Research. "An enterprise-wide approach to controlling financial crime will minimize vulnerabilities and costs. Chartis considers NICE Actimize as a leader in financial crime risk management providing best-in-class depth and breadth of functionality and support services."

“The financial crime landscape evolves continuously. Successfully providing enterprise financial crime solutions requires focus, commitment, and innovation,” said Amir Orad, president and CEO of NICE Actimize. “I am proud to see that once again this year, Chartis recognizes NICE Actimize’s ongoing investment and dedication to enabling the financial services industry to combat financial crime threats and ensure compliance.”

About Chartis Research

Chartis Research is a leading provider of research and analysis covering the global market for risk management technology. Its goal is to support enterprises as they drive business performance through better risk management, corporate governance and compliance. Chartis analyses the systems, products, vendors, applications and trends in the risk technology marketplace. This analysis is published in its flagship industry reports, white papers and research articles. www.chartis-research.com.
